

EQUIFORCE B+ & EQUIFORCE B+ Liquid

B-vitamins play a vital part in the metabolism of a horse's energy. Furthermore the horses need for B-vitamins can be higher than normal during periods of shedding/moulting and hard work/competition.

EQUIFORCE B+ contains multiple B-vitamins (B1, B2, B6, and B12), with MSM and brewer's yeast. The liquid contains B3, B5m, B7, B9 and choline chloride instead of MSM and brewer's yeast. Supplementation is recommended in case of fatigue, old age, hard work, and restitution after a period of decreased resistance. Extra B-vitamins supplementation is also beneficial at decreased function of the large intestine. The supplement usually restores the horse's energy and B-vitamin levels back to normal in 3-4 weeks. Because B-vitamins are water soluble, surplus B-vitamins cannot be stores by a horse for later use and cannot accumulate in harmful amounts.

Daily dose

Horses: 40 g (3 scoops)
Ponies: 25-30 g (2-2½ scoops)

Package sizes

1 kg (25 portions of 40 g)
3 kg (75 portions of 40 g)

Nutritional analyses

	per kg	per 40 g
Vitamin B1	4,000 mg	160 mg
Vitamin B2	1,750 mg	70 mg
Vitamin B6	1,750 mg	70 mg
Vitamin B12	10 mg	0.4 mg
MSM	40,000 mg	1,000 mg
Brewer's yeast	10,000 mg	250 mg

Daily dose

shake well before use

Horses: 20 ml
Ponies: 10-15 ml

Package size

1 liter (50 portions of 20 ml)

Nutritional analyses

	per liter	per 20 ml
Vitamin B1	3,000 mg	60 mg
Vitamin B2	6,000 mg	120 mg
Vitamin B6	5,000 mg	100 mg
Vitamin B12	20 mg	0.4 mg
Biotin	200 mg	0.4 mg
Folic Acid	1,000 mg	20 mg
Niacin	30,000 mg	600 mg
D-Panthenol	15,000 mg	300 mg
Choline Chloride	100,000 mg	2,000 mg
